Alumi-Co^{fl b} TM

Our Mission:

Providing simple, effective and innovative poultry products to make your life easier while keeping your animals happy, healthy, and safe from predators!

Welcome to Superior Poultry Products LLC and thank you for your interest in our products. Regenerative, pasture-based farming and heritage-breed chickens have always been my passion.

Our story starts in 2012 when we bought our first 50 layers and built our first chicken coop. After a couple years of raising broilers & layers on pasture it became very obvious we needed a better coop for our farm. We went to a local weld shop with a dream & a vision in our mind to develop a coop that our chickens and our farm could truly enjoy! The brand Alumi-Coops™ was born with three key features in mind:

1. Built to last with an aluminum frame.
2. A smooth, adjustable wheel system (our proprietary Alpha-Lite Wheel System™.)
3. Designed from a chicken's perspective to completely eliminate stress, therefore gaining more production!

Now even though we have thousands of farms & homesteads experiencing the the Alumi-Coop™, we are always striving to build a culture of continuous improvement in all we do!

Thank you for your business,
David Miller and SPP Team

What Size Do I Need?

Whether you are new to poultry farming or you have years of experience, we are committed to helping you choose the best possible option.

In the graph below, you can determine which coop size best fits your specific needs.

Coop Size	Turkeys	Ducks	Layers	Broilers
5 x 6	4-8	6-10	10-12	10-20
6 x 10	8-15	12-20	24-30	30-40
10x 12	12-30	24-40	40-60	60-80
12x 12	24-36	60-80		75-100
12x24	50-75	120-160		175-200

Additional Tips

Turkeys: Use the second number in the graph if you are using hybrid genetics/16 week harvest dates. For heritage breeds, use the first number/24 week harvest dates.

Ducks: Use the second number in the graph if you are using Pekin meat genetics and the first number if using Muscovy meat ducks or duck egg Layers.

Layers: Use the second number in the graph if you are using hybrid Layers, and the first number if using heritage breed Layers.

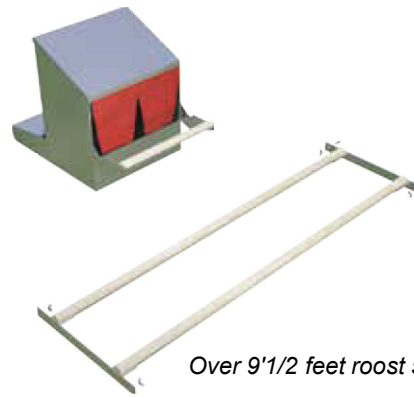

Broilers: Use the second number in the graph for Cornish-Cross genetics/6-8 week harvest dates, 4-6 lbs carcass weights. Use the first number if using a slower growing strain such as Freedom Ranger or a heritage breed/9 week harvest dates.

Why a 5x6 Alumi-Coop?

- Strong and durable aluminum frame
- Smooth adjustable wheel system.
- Heavy-duty Shelter Rite vinyl cover.
- 1/2" 14-gauge galvanized mesh for extreme predator resistance.

Cover folds back to feed!

Why a 12x12 Alumi-Coop?

- Strong and durable aluminum frame
- Smooth adjustable wheel system.
- Heavy-duty Shelter Rite vinyl cover.
- 1"x1" 14-gauge galvanized after-weld netting for extreme predator resistance.
- Plenty of room up to 100 birds.
- Designed from a chicken's perspective to completely eliminate stress.
- Adjustable feeders to eliminate feed waste.
- 16 feet of feed space to minimize competition!

Precautions: Please take off cover for winter as these will not handle a heavy snow-load. We only offer the 12x12 in one package option as our feeding system works in conjunction with our canvas cover.

The 12x12 is our favorite broiler coop at our farm! Though not as versatile as the 10x12, it is easier for our children to help feed! So far our best growouts were 46 days - 4 1/2 - 5 1/2 lb. dress weights with Ross 308 genetics from Moyer Chicks.

Features:

- 12x12 Alumi-Coop
- Superior Outside Feeding System
 - 50 lb capacity
- Plasson Bell Waterer
 - 16 gallon tank reservoir

MSRP \$4,538.00

*Prices Subject To Change

Cover folds back to feed!

Why a 12x24 Alumi-Coop?

- Strong and durable aluminum frame
- Smooth adjustable wheel system.
- Heavy-duty Shelter Rite vinyl cover.
- 1"x1" 14-gauge galvanized after-weld netting for extreme predator resistance.
- Plenty of room up to 200 birds.
- Designed from a chicken's perspective to completely eliminate stress.
- Adjustable feeders to eliminate feed waste.
- 32 feet of feed space to minimize competition.

Precautions: Please take off cover for winter as these will not handle a heavy snow-load. We only offer the 12x24 in one package option as our feeding system works in conjunction with our canvas cover.

A couple hundred of 12x24's are now in use since their introduction in 2021. Feedback on growouts from our farm and across the United States & Canada have been very positive. However some key things to keep in mind if considering the 12x24 are: Do not use on very hilly or uneven fields. While you can easily move the 12x24 with one person pulling straight ahead it is best to use two people after locking handle mechanism in place. Not recommended in tall grass higher than 24 inches! Pictured is a 12x24 on our farm hogging down a 16 inch tall clover-grass mix.

Alumi-Coop 4-Seasons Enclosure Kits

30-gauge clear Crystal-Clear vinyl panels. Very simple installation/zip ties to frame. Fits 5x6 - 6x10 - 10x12.

Wintertime Layer Setup

Step #1 - Prepare a 4-6 inch wood chip bed on the south side of a building. Make it 2 feet wider and longer than your Alumi-Coop.

Step #2 - Install 4-Seasons Kit with included zipties.

Step #3 - Pull Alumi-Coop on top of wood chip bedding facing south. Add shavings as needed to keep bedding pack dry.

Note: Be sure to move Superior Poultry feeder & waterer inside of Alumi-Coop for winter. This will keep water from freezing as long as daytime temps rise above 32°. If the sun is shining, waterer will be ok until about 20° daytime temps.

Alumi-Coop Mobile Greenhouse
